

SPSE Jecna Test Case

Test Case ID: APP_02
Test Designed by: Miro Slezák
Test Name: Create New Order with Guests and Room Assignment
Brief description: Verify successful creation of a new reservation with guest management and room selection.

Pre-conditions

- 1. `basic_tableset.xml` already imported.
- 2. Application is running and on the main menu.

Dependencies and Requirements

Software/Hardware: Same as APP_01.

Step	Test Steps	Test Data	Expected Result	Notes
1	Click "Nová Objednávka" on the main menu.	N/A	AddOrderForm opens with room dropdown pre-populated from imported data.	Verify rooms from <code>complex_tableset.xml</code> appear (e.g., "101", "201").
2	Enter price/night: <code>150.00</code> , nights: <code>3</code> , check-in date: <code>[Tomorrow's date]</code> .	<code>150.00</code> , <code>3</code> , future date	Inputs accepted. Date picker blocks past dates.	If past date entered, show error: "Datum příjezdu musí být v budoucnu."
3	Click "Přidat Osobu" to add a guest.	Test guest: <code>Jana Nováková</code> , <code>jana@test.cz</code>	AddPersonForm opens. Guest added to list after saving.	Verify email format validation rejects <code>jana@test.</code>

4	Click "Uložit Objednávku".	N/A	"Objednávka úspěšně přidána!" message. Order appears in SQL Server Orders table.	Check Paid status is false by default.
5	Click "Vyhledat" on main menu. Search for order date.	Date that was used before	New order appears in search results	Double click to verify the order

Validation Criteria:

- Order appears in database with correct status
- Guest `jana@test.cz` is linked to the order via `OrderRoles` table.
